

## MEDICINES FOR EPILEPSY

The Medicines for Children website was created to provide families with accurate and reliable information on children's medicines.

On the website you can find information leaflets on over 220 children's medicines.

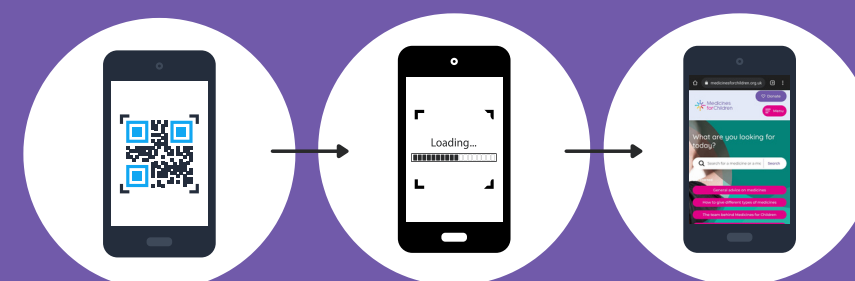

This poster specifically lists all medicines on our website for epilepsy. Scan the QR code to be taken to the relevant information leaflet.

Medicines for Children works alongside children, young people, families and carers to provide answers to frequently asked questions including:

- What if I forget to give a medicine?
- How to administer the medicine
- Any Possible side effects

### How to use QR codes:

1. Open the camera app on your phone or download a QR scanner from the app store for free.
2. Point your camera or scanner at your chosen QR code to go to the relevant page, and click on the icon or banner that appears on the screen.
3. Information with the QR code will automatically load.
